PROFESSIONAL SUMMARY

I'm Data Science and Cybersecurity professional with a deep technical foundation in AI, Machine Learning with Quantum, and Deep Learning. Specialized in data analysis, visualization and intelligent defense mechanisms, with hands-on experience. Always eager to learn and dedicated to transforming complex problems into meaningful practical solutions.

EDUCATION

B.Tech (Artificial Intelligence and Data Science),
S.A. ENGINEERING COLLEGE,
Current CGPA: 8.47, Expected (2026).

Higher Secondary (HSC), Group - Computer Science
VELAMMAL MATRICULATION HIGHER SECONDARY SCHOOL, Percentage: 80.33, Batch (2022).

Secondary (SSLC),
VELAMMAL MATRICULATION HIGHER SECONDARY SCHOOL, Percentage: 59.8, Batch (2020).

SKILLS

Hard Skills Programming:
Python, SQL, Java.
AI/ML: ML, DL, Quantum-ML.
Data Visualisation: Power BI, Tableau.

Soft Skills:
Problem-solving and critical thinking.
Effective communication, teamwork and leadership management.
Adaptability and eagerness to learn emerging AI trends.
Time management and organisational skills.

TECHNICAL PROFICIENCIES

Area of study: Cybersecurity, AI & ML, Data Science.
Tools: VS Code, MS Office 365, Power BI, Tableau and various AI-powered tools.

PROJECTS

Trek-Buddy (AI-based vacation planning system).
Developed an AI-powered travel planner for Tamil Nadu that recommends hotels, restaurants, and activities based on city, budget, and ratings using AI-generated review data.

Hybrid model for synthetic metadata generation.
Developed a hybrid quantum-classical GAN framework that generates synthetic metadata to strengthen blue team capabilities in detecting various unknown threats and vulnerabilities.

Hybrid Classical-Quantum Machine Learning Framework for Network Anomaly Detection.
Developed a hybrid machine learning model to detect unknown attack by simulating system behaviour and anomalies using Auto-Encoder, LSTM and QML sequence models, achieving 92% detection accuracy on simulated network data.

GENFACE: Efficient AI-Driven forensics framework for suspect face generation and criminal identification system. (Final-year project, in-progress)
Building an AI-driven forensic system that generates suspect faces from witness descriptions and matches them against criminal databases to speed up investigations.

EXPERIENCE

Intern: Centre for Development of Advanced Computing, Tidel-Park, Chennai. (June 2025 to May 2026)

A research organisation focused on advanced computing technologies.

- Engaged in Data Science and Cybersecurity research in Quantum Computing and High-Performance Computing
- Currently supporting the active projects around quantum-safe security frameworks and protection solutions for cloud infrastructure.

HACKATHON EXPERIENCE

- Won 2nd price in STELLA MARIS COLLEGE
- Won 3rd price in Meenakshi Sundararajan Engineering College.
- Participated in 24 hours hackathons in SIMATS DEEMED UNIVERSITY.

CERTIFICATION

SQL and Relational Databases – IBM
Data Visualisation Using Python – IBM & Beeja Academy
Python for Data Science – IBM
MongoDB Essentials – Zero to Infinity Academy
